PINOCCHIO

BY MARCO GRILLI

A storyteller opens up a window of his bandwagon and from there he tells a tale... a tale about Pinocchio.

The story that everybody knows will be revisited once again while maintaining the fundamental points of the protagonist's great journey which starts with the creation from wood. When Pinocchio learns a few tricks here and there, he firstly encounters the wise Jiminy Cricket (Grillo Parlante), then the Cunning Cat and Sly Fox (Il Gatto e la Volpe)... and soon enough Pinocchio meets the terrifying Fire-Eater (Mangiafuoco)!

In the Land of Toys (Signore dei Balocchi), somebody will try to convince Pinocchio that culture and traditions are useless.

The meeting with Mister Geppetto represents the culminating point of Pinocchio's realisation about what truly matters. He starts to understand how to grow and respect others - by taking responsibility. Pinocchio finally sees the support and love of others.

Through animation and lyrical, dream-like moments, children can witness the awareness of the little boy growing and gaining his autonomy. Acted live and accompanied by a pleasant music, the show uses the techniques of different types of puppets.
